Acquired hands-on experience with a variety of hardware components. Also, learned how to diagnose and resolve common hardware issues and perform basic upgrades.

PROJECTS

My Portfolio Website

Made my very own portfolio website hosted live on the internet with frontend languages showcasing my projects and education details. I have also built a contact form that stores users' input in the database.

<https://maharjanshreejal.com.np>

Garbage Management System

I was solely engaged in building a web application for the 4th sem project for BCA. The primary objective was to trace the regular metropolitan city garbage van and find all the nearby dustbins on the map.

https://github.com/shreejal27/Garbage_Management_System

Public Vehicle Tracker

Build a public vehicle tracker web application as the 6th sem project of BCA. The main objective was to track your desired public vehicle on the map. The project also implement Haversine algorithm to find the nearest vehicle stop from the user's location.
